

Brite Sparks 2026 - Hackathon Guidelines

How It Works

1. **Use Cases:** All use cases will be shared on 21 Aug at 5:00 PM IST.
2. **Choose One:** Review the use cases and select one use case to work on.
3. **Confirm Your Choice:** Email your selected use case to hackathon@britesys.com.
4. **Start Building:** The hackathon begins on 22 Aug at 5:00 PM IST.
5. **Surprise Challenge:** Keep an eye on your email during the hackathon - there will be a surprise challenge!
6. **Submit:** Complete and submit your solution by 24 Aug at 12:00 PM IST.

Do's

- Read and understand the selected use case before starting.
- Be creative and come up with your own approach.
- Test your solution before submitting.
- Reach out to us at hackathon@britesys.com if you have any questions.
- Keep checking your email for important updates.
- Submit your solution before the deadline.
- Make sure your 5-minute demo clearly explains your solution.

Don'ts

- Don't work on more than one use case.
- Don't use AI tools to build the solution.
- Don't copy someone else's work or solution.
- Don't submit work created by someone else as your own.
- Don't share your solution with other participants.
- Don't miss the submission deadline.
- Don't ignore important emails or updates from the Brite team.

What to Submit

Every submission must include:

1. **Working Solution** – It must run successfully in a clean environment using only your README instructions. If it does not start, it will not proceed to judging.
2. **Real Commit History** – Commit your work as you build. Do not submit a repository with only one final commit.
3. **DECISIONS.md** – Document what you chose, rejected, cut due to time, what the solution does not do, and what you would improve first.
4. **AI-USAGE.md** – Document your AI usage as per the AI Policy.
5. **README.md** – Include clear setup, dependencies, configuration, and run instructions. Test the instructions yourself before submitting.

Before You Submit

Please make sure:

- Your repository is accessible.
- All required files are included.
- Your README contains clear setup instructions.
- Any required dependencies are mentioned.
- The application can be set up and run in a clean environment.
- You have tested the setup instructions yourself.

Questions & Support

For any questions or clarifications during the hackathon, please email:

hackathon@britesys.com

- Confirm your selected use case
- Ask questions or request clarification
- Reach out for technical support

Important Dates

Date & Time	Activity
21 Aug – 5:00 PM IST	Use Cases Shared
22 Aug – 5:00 PM IST	Hackathon Begins
	Surprise Challenge
24 Aug – 12:00 PM IST	Hackathon Closes

Have fun, be creative, experiment, and let your Brite Spark shine!
